Experience

Full Stack Developer

May 2025 – Present

Asset Sense Private Limited

Gurgaon, Haryana

Built production-grade AI automation systems including multilingual customer support chatbots, document generation workflows, and social media automation platforms using n8n and OpenAI integrations.

Integrated Gmail API, Google Docs API, Google Drive API, webhooks, approval workflows, and custom automation pipelines for business process automation.

Implemented Google Analytics 4 (GA4), Google Tag Manager (GTM), Google Ads Conversion Tracking, Meta Pixel, and SEO optimization strategies across multiple production systems.

Web Development Intern

Nov 2024 – Mar 2025

Infoicon Technology Pvt. Ltd.

- Contributed to real-world client projects including PG listing and property management platforms.
- Implemented frontend components, responsive layouts, backend APIs, and dynamic business features.
- Worked with React.js, Node.js, Express.js, MongoDB, Git, GitHub, and Tailwind CSS during internship projects.

Projects

Property Listing & Coworking Platform (SaaS)

- Built a virtual office and coworking management platform using React.js, Vite, Node.js, Express.js, MongoDB, and Tailwind CSS.
- Implemented multi-role authentication, office booking system, admin dashboard, payments, and order tracking features.
- Designed SEO-friendly responsive UI for businesses and users seeking office and coworking space solutions.

GurgaonFlat.com — Real Estate Listing & CRM Platform

- Built a full-stack real estate platform using Next.js, TypeScript, Node.js, Express.js, MongoDB, and Cloudinary for property listings, search, and lead management.
- Implemented secure authentication with RBAC, protected routes, user management, role-based permissions, and a complete end-to-end authorization flow.
- Developed a CRM and admin dashboard with lead management, user management, property management, search, sorting, filtering, and operational analytics features.
- Implemented server-side rendering (SSR), dynamic SEO metadata, optimized image delivery through Cloudinary CDN, and SEO-friendly property/location pages for improved discoverability and performance.

AI Document Automation System

- Built a production-grade workflow automation system that automatically generates Rent Agreements, NOCs, and Undertaking Forms for Private Limited, LLP, Proprietorship, Partnership, and HUF businesses.
- Integrated Gmail API, Google Docs API, Google Drive API, approval workflows, and custom JavaScript automation using n8n.
- Automated the complete lifecycle from form submission to document generation, approval, storage, and client delivery.

Blood Bank Management System

- Developed a healthcare management platform to streamline blood inventory management, donor registration, and blood request processing between hospitals and recipients.
- Implemented role-based access control, JWT authentication, blood compatibility validation, and secure REST APIs using MERN stack technologies.
- Designed responsive dashboards for managing blood stock, donor records, and emergency blood requests efficiently.

MyWorkEstate – Real Estate- Virtual Office Management Platform

- Developed a comprehensive real estate and virtual office platform enabling users to explore, manage, and inquire about commercial properties, coworking spaces, and virtual office solutions.
- Built property listing management, CMS-driven content, customer inquiry workflows, authentication, payment integration, and admin dashboards.
- Implemented SEO optimization, responsive design, and business management features to improve lead generation and customer engagement.

AI Social Media Automation Platform

- Built an AI-powered social media automation system that automates content generation, approval workflows, scheduling, and publishing across digital marketing channels.
- Integrated AI-driven content creation workflows and automation pipelines using n8n, APIs, and custom JavaScript logic.
- Reduced manual marketing effort while improving content consistency, publishing efficiency, and campaign execution.

PhysioWell Appointment Booking Platform (SaaS)

- Developed a healthcare appointment booking platform using React.js, Node.js, Express.js, MongoDB, Cloudinary, and Tailwind CSS.
- Integrated role-based authentication, therapist scheduling, admin management system, and appointment workflows.
- Implemented secure backend APIs and responsive frontend design for a seamless booking experience.

AI Customer Support Chatbot

- Developed a multilingual AI-powered chatbot for customer support, lead qualification, and customer engagement.
- Automated customer interactions, inquiry handling, lead capture, and business workflow integration using AI and n8n.
- Improved response times and reduced manual support effort through conversational automation.

Multi-Vendor Resort Booking Platform (SaaS)

- Created a scalable resort booking platform using MERN Stack, JWT Authentication, Multer, Cloudinary, and MongoDB.
- Enabled property owners to manage resorts, bookings, listings, notifications, and secure online payments.
- Developed advanced search, authentication, and responsive UI features for end users and vendors.

Education

Ajay Kumar Garg Engineering College

Bachelor of Technology in Information Technology — SGPA: 7.5

2020 – 2024

Ghaziabad

Urmila Educational Academy

Intermediate (XII): 81% — High School (X): 85%

Achievements & Certifications

- Solved 600+ DSA problems on GeeksforGeeks and 250+ problems on LeetCode.
- AIR 242 in Coding Ninjas Coding Competition.
- 3-Star CodeChef Programmer.
- 5-Star HackerRank Problem Solver.
- Certified in Ethical Hacking Essentials by EC-Council.
- Completed DBMS Certification from Infosys Springboard.
- Completed SQL Certification from SoloLearn.
- Completed Advanced Data Structures Algorithms Course from Udemy.
